

Job brief

We are seeking an experienced Control Systems Engineer to join our team. The successful candidate will be responsible for designing, developing, and implementing control systems for various applications.

The ideal applicant will have a solid electrical and control engineering foundation and a desire to create original solutions to challenging issues.

Responsibilities

- Design and develop control systems
- Create control features to ensure systems effectively meet the organization's quality standards
- Troubleshoot issues with control systems
- Review reports and test results
- Test program operation to verify it remains functional

Requirements

- Bachelor's or Master's degree in Electrical Engineering or related field.
- Experience in control systems engineering or related field.
- Strong analytical skills.
- Excellent written and verbal communication skills.
